

Course description / Instructor-led

Data Protection on Kubernetes

Learn how Everpure protects stateful applications and data running on Kubernetes through high availability, disaster recovery, and enterprise backup and restore.

Course Benefits

Running containers and virtual machines on Kubernetes is only the beginning. This session explores how Portworx helps organizations build resilient, enterprise-ready application platforms. Participants will examine how to maintain availability for critical data, recover applications after cluster failures, and use Portworx Backup to protect and restore stateful workloads.

Course Outline

During this course you will learn:

Integrating stateful applications into
Kubernetes environments

Improving application and data availability with
Portworx Enterprise

Protecting workloads through cross-cluster
disaster recovery

Backing up and restoring stateful applications with
Portworx Backup

Intended Audience

- Customer
- Partner

Course Type

ILT

Duration

ILT: 3 hours

Recommended Next Steps

Continue exploring Portworx training and certification resources to deepen your Kubernetes data-management skills.

What is the **Everpure Skill** subscription offering?

Everpure Skill is our new education and training subscription that bundles both existing and new PEAK offerings. Our new subscription model is designed to enhance your experience by offering a comprehensive bundle of education and learning resources. This service aims to support you throughout your learning journey with us, empowering you with the knowledge and skills to fully leverage the Everpure platform. Our goal is to build a community of knowledgeable champions, while ensuring you receive maximum value from our solutions.
