

Course description / Instructor-led

Enabling the Enterprise Data Cloud with Fusion and Realms

This three-hour Accelerate course gives customers and partners a practical introduction to how Fusion and Realms help create a cloud-like operating model on-premises. Learners explore Fusion as a fleet-level control plane for FlashArray and FlashBlade, including fleet management, remote provisioning, presets, workloads, protection, and workload placement. They also examine FlashBlade Realms and Servers as the foundation for secure multi-tenancy, delegated administration, isolated data access, and tenant-specific network and identity boundaries.

Course Benefits

Through demonstrations and guided discussion, learners connect these capabilities to the Enterprise Data Cloud (EDC) strategy and see how they can simplify operations, standardize storage delivery, improve administrative autonomy, and support secure shared infrastructure. The session also introduces Fusion-MCP and shows how AI assistants can use Fusion context to help investigate storage and workload performance.

Course Outline

During this course you will learn:

Introduction

- Enterprise Data Cloud overview
- Fleet-level management

Fusion Architecture & Components

- Fleets and fleet coordination
- Keys, presets, and workloads
- Fleet insights and operational analysis

Enabling Fusion

- Identity and access services
- Management connectivity
- Time synchronization
- Purity compatibility

Storage Provisioning and Automation

- Repeatable provisioning
- Protection policies and service levels
- Workload placement
- Remote storage management
- Cross-platform configuration and validation

FlashBlade Multi-Tenancy

- Realms and delegated administration
- Servers and isolated data access
- Network, DNS, and identity configuration
- Tenant isolation and access policies

Implementation Dependencies

- Realm creation
- Network resource delegation
- Service configuration
- Server creation
- Access policy assignment

Intended Audience

- Customer
- Partner

Course Type

ILT

Duration

ILT: 3 hrs

What is the **Everpure Skill** subscription offering?

Everpure Skill is our new education and training subscription that bundles both existing and new PEAK offerings. Our new subscription model is designed to enhance your experience by offering a comprehensive bundle of education and learning resources. This service aims to support you throughout your learning journey with us, empowering you with the knowledge and skills to fully leverage the Everpure platform. Our goal is to build a community of knowledgeable champions, while ensuring you receive maximum value from our solutions.
